CBC UNI42 PROGRAMMABLE TUBE BENDING MACHINE 240V

UNI 60 model pictured with Optional Base

The CBC tube bending machines range from ‘easy to use’ simple machines to precision programmable production machines. A comprehensive tooling range ensures high bend quality on all models. All formers can be specified with either counterformers or guide rollers depending on material and wall thickness. Optional equipment includes moving arm with positioning stops and plane of bend indicator. Models are available for fast bending of smaller tubes right up to the large capacity CBC UNI 89, capable of effortlessly bend 88.9mm x 8mm wall mild steel tube.

FEATURES

- Compact, simple, “easy to use” machine
- Superb bend quality with rotary bending around former
- Complete range of tooling available including cast iron formers c/w ring in a large range of standard sizes and counter bending pressure with either counterformer or a pair of rolls according to wall thickness of the tube
- Adjustable limit switch with degree scale for easy setting of required angle
- Bends angles up to 180° with allowance for over bending to compensate for spring back
- Programmable model with 50 programs with up to 9 steps per program

TECHNICAL INFORMATION

MODEL		UNI 42 DIG
Capacity mm (mid steel)		42.4 x 3.2
Maximum Bending Angle		180
Motor	KW	0.56
Programs		50
Bends/Program		9
Weight	kg	35
Length	mm	600
Width	mm	170
Height	mm	350
